ABBREVIATIONS OF NAMES OF JOURNALS

This list gives the form of references used in MATHEMATICAL REVIEWS and the complete title; the place of publication and other pertinent information are given in parentheses when desirable for clarity. An asterisk indicates that the journal has not previously been listed. A paragraph symbol (§) indicates a bibliographic journal.

American Mathematical Society

ISBN PREFIX 0-8218

The AMERICAN MATHEMATICAL SOCIETY publishes books and journals in mathematics at the graduate and research levels in pure and applied mathematics, publishing about 25 new books annually and maintaining a backlist of about 750 titles. Fifteen journals are published, the most important of which, **MATHEMATICAL REVIEWS**, publishes about 30,000 reviews annually of worldwide mathematics.

Theory of Probability and Mathematical Statistics

A. V. Skorohod, Editor-in-chief, the original Russian journal;
Lev J. Leifman, for the American Mathematical Society, the
English translation.

This journal is a cover-to-cover translation into English of *Teorija Verojatnostei i Matematicheskaja Statistika*, published by Kiev University and containing papers by mathematicians working throughout the Ukraine. The editorial board includes I. I. Gihman, and V. S. Koroljuk, scholars instantly recognizable worldwide for work in probability and statistics. The journal covers a wide range of topics with papers of high quality.

The series starts with the translation of Russian number 1, published in 1970. Numbers 22 and 23 will be the 1981 numbers.

For a limited time, new 1981 subscribers will be given a free set of the back volumes from 1974 through 1980 (Volumes 1 — 21).

1981 Subscription prices: List \$160, AMS member \$80.

Vestnik of Leningrad University (Mathematics)

Editors: V. V. Petrov, Deputy Editor-in-chief,
the Mathematics section of the original Russian,
Lev J. Leifman, The English language translation

This journal is a complete translation of the mathematics sections of *Vestnik Leningradskogo Universiteta* beginning with the 1968 issues of the Russian publication. Many fields of mathematics are covered, both pure and applied. *Vestnik* publishes papers by staff members and visiting scientists in the mathematics faculty of Leningrad University, recognized as one of the top mathematics faculties in Russia. Among the distinguished editors are M. K. Gavurin, S. S. Lavrov, O. A. Ladyzenskaja, S. M. Lozinskii, L. A. Petrosjan, V. A. Pliss and D. K. Faddeev.

Starting with the 1980 subscription an accelerated publication schedule has been adopted which will reduce the gap between the Russian and English versions to the minimum time required to obtain and edit translations.

From 1980 to 1983 each annual subscription will consist of two years of the Russian journal with no corresponding increase in the subscription price.

For a limited time, new subscribers will be given a free set of the back volumes from the 1974 — 1980 Subscriptions (Volumes 1 — 8).

1981 Subscription Prices: List \$130, AMS Member \$65.

Mathematical Reviews Cumulative Index

1973 - 1979

VOLUMES 45 THROUGH 58 OF MATHEMATICAL REVIEWS

This massive index, the first cumulative index of Mathematical Reviews containing both author and subject listings, is being prepared from the working files of MR and will index all the reviews in volumes 45 through 58, producing an estimated 700,000 entries representing over 230,000 entries in MR for the period. It will total about 9,200 pages in 12 volumes.

The CUMULATIVE INDEX will have the same form as the Annual Index for 1978 as it is being generated by the same computer program.

The first part, an **Author and Key Index** will be about 5,000 pages. The entries will give full bibliographic information about all items that have been reviewed in MR between January 1973 and December 1979, inclusive. This is about 220,000 entries. In addition, there will be an entry for about 2,500 items not reviewed in MR for which the editors think bibliographic information should be made available. They will be treated exactly as reviewed items, generally with references to *Zentralblatt für Mathematik*, *Reverativnyi Zhurnal*, or other reviewing journals.

Items are listed alphabetically by author; those having several authors are listed in full under each author. Surnames of authors are cross-referenced for name changes or variations of spelling. The original entry for which an erratum or other commentary has been reviewed in a subsequent entry will be identified by an (E).

The author index section is estimated to have about 300,000 entries because of multiple authors.

In the **Author Index** the names of persons associated with an item in a capacity other than that of author, e.g., editor, translator, subject of a biography, are also listed.

The **Key Index** section of the author index will consist of all items for which there is no clear author and will be about 70 percent cross-referenced. Included are proceedings of meetings, tables, obituaries, biographies, etc.

The entries under a given heading (i.e., the author or a title) are listed in order of publication dates. Co-authored items are treated on the same basis as those by the author alone.

The **Subject Index**, to consist of about 380,000 listings on 4,200 pages, will cover all subject areas as classified by MR. For each item there will be one full listing in each subject area in which it has been classified, with all authors, title and MR number, if any. Cross-references will be given under each author after the first to the original listing.

The arrangement of each title entry is that of the heading of the original review in MR. Titles in English, French, German, and Italian are usually given as they appeared in the original. Articles in other languages are given in English translation.
